### Background and purpose

With access to rich dynamic content, connectivity across the globe, a platform for creativity and a place to engage in debate, digital technologies provide a powerful tool for learning. Digital technologies give staff opportunities to enhance children's learning in their care and enable staff to become more efficient in their work. The very nature of digital technologies means that they should be used with care and particular attention given to demonstrating appropriate behaviours and avoidance of misuse at all times.

Professional integrity and strong moral purpose must be upheld at all times by staff. It is the duty of all staff members to ensure that children in their care get the very best start to the world of digital technology. This should include provision of a rich, robust online safety education for the children with clear reporting procedures for infringements to safeguarding. Having a transparent approach to using digital technology is a must. Additionally, staff should develop critical thinking in their children, along with strategies for avoiding unnecessary harm and strategies for dealing with online safety infringements.

The school's internet, network and ICT systems and subscriptions to services should be used with the utmost professionalism at all times. The school will aim to provide its staff with secure systems which will have filtering, monitoring and virus protection included. Anyone with access to the systems should be aware that their use of the systems is monitored, and this can be used to form evidence should any suspected infringements occur.
