Maths progression

Key area	Three and Four- Year-Olds	Phase 2		Phase 3		Phase 4	
	Reception Early Learning Goals	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Place Value: Counting	Recite numbers past 5. Say one number for each item in order: 1,2,3,4,5. Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle'). Count objects, actions and sounds. Count beyond ten. Verbally count beyond 20, recognising the pattern of the counting system.	<ul> <li>To count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number.</li> <li>To count in multiples of twos, fives and tens from different multiples to develop their recognition of patterns in the number system, including varied and frequent practice through increasingly complex questions.</li> <li>To recognise and create repeating patterns with objects and with shapes.</li> </ul>	<ul> <li>To count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward.</li> </ul>	<ul> <li>To continue to count in ones, tens and hundreds, so that pupils become fluent in the order and place value of numbers to 1000.</li> <li>To count from 0 in multiples of 4, 8, 50 and 100.</li> </ul>	<ul> <li>To count in tens and hundreds, and maintain fluency in other multiples through varied and frequent practice.</li> <li>To count in multiples of 6, 7, 9, 25 and 1000.</li> <li>To count backwards through zero to include negative numbers.</li> <li>To find 1000 more or less than a given number.</li> </ul>	<ul> <li>To count forwards or backwards in steps of powers of 10 for any given number up to</li> <li>1 000 000.</li> <li>To interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero.</li> </ul>	

Place Value: Represent	Develop fast recognition of up to 3 objects, without having to count them individually ('subitising'). Show "finger numbers' up to 5. Link numerals and amounts: for example, showing the right number of objects to match the numeral, up to 5. Experiment with their own symbols and marks as well as numerals. Subitise. Link the number symbol (numeral) with its cardinal number value. Subitise (recognise quantities without counting) up to 5.	•	To read and write numbers from 1 to 20 in numerals and words. To count, read and write numbers to 100 in numerals. identify and represent numbers using objects and pictorial representations	•	To read and write numbers to at least 100 in numerals and in words. identify, represent and estimate numbers using different representations including number lines	•	To read and write numbers up to 1000 in numerals and in words. identify, represent and estimate numbers using different representations	•	To read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. identify, represent and estimate numbers using different representations	•	To read and write numbers to at least 1 000 000 and determine the value of each digit. To read Roman numerals to 1000 (M) and recognise years written in Roman numerals.		To <i>say</i> , read and write, numbers up to 10 000 000 <i>accurately</i> and determine the value of each digit.
---------------------------	---	---	--	---	---	---	---	---	---	---	---	--	--

Value: order numbers	Compare quantities using language: 'more than', 'fewer than'. Begin to describe a sequence of events, real or fictional, using words such as 'first', 'then' Compare numbers.	• To identify one more and one less than a given number.	<ul> <li>To compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs.</li> </ul>	• To compare and order numbers up to 1000.	<ul> <li>To order and compare numbers beyond 1000.</li> </ul>	To order and compare numbers to at least 1 000 000 and determine the value of each digit.	To order and compare numbers up to 10 000 000 <i>accurately</i> and determine the value of each digit.
Place Val Compare and ord	Understand the 'one more than/one less than' relationship between consecutive numbers.						
Co	Compare quantities up to10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.						

Place Value: Understanding place value	Understand the 'one more than/one less than' relationship between consecutive numbers. Explore the composition of numbers to10. Have a deep understanding of numbers to 10, including the composition of each number.	<ul> <li>To recognise the place value of each digit in a two-digit number (tens, ones) to become fluent and apply their knowledge of numbers to reason with, discuss and solve problems.</li> <li>To begin to understand zero as a place holder.</li> </ul>	<ul> <li>To recognise the place value of each digit in a three-digit number (hundreds, tens, ones) and apply partitioning related to place value using varied and increasingly complex problems, building on work in year 2 (for example, 146 = 100 + 40 and 6, 146 = 130 + 16).</li> </ul>	<ul> <li>To recognise the place value of each digit in a four-digit number.</li> <li>To begin to extend their knowledge of the number system to include the decimal numbers and fractions that they have met so far.</li> </ul>	<ul> <li>To extend and apply their understanding of the number system to the decimal numbers and fractions that they have met so far.</li> </ul>	<ul> <li>To use negative numbers in context, and calculate intervals across zero.</li> </ul>
Place Value: Rounding				<ul> <li>To round any number to the nearest 10, 100 or 1000.</li> <li>To connect estimation and rounding numbers to the use of measuring instruments.</li> </ul>	<ul> <li>To round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000.</li> </ul>	<ul> <li>To round any whole number to a required degree of accuracy.</li> </ul>

Solve real mathemat problems v numbers u to 5. Begin to de sequence of real or ficti words such 'first', 'the	scribe a f events, ponal, using as	<ul> <li>To use place value and number facts to solve related problems to develop fluency.</li> </ul>	<ul> <li>To solve number problems and practical problems involving these ideas.</li> </ul>	<ul> <li>To solve number and practical problems that involve all of the above and with increasingly large positive numbers.</li> </ul>	<ul> <li>To solve number problems and practical problems that involve all of the above.</li> </ul>	<ul> <li>To solve number and practical problems that involve all of the above.</li> </ul>
--	---	---	--	--	--	---

#### Savile Park Primary School Maths progression

Addition and subtraction: Mental calculations	Develop fast recognition of up to 3 objects, without having to count them individually ('subitising').Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle'). Show 'finger numbers' up to 5. Subitise. Explore the composition of numbers to 10. Automatically recall number bonds 0-5 and some to 10. Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.Have a deep understanding of numbers to 10, including the composition of each number. Subitise (recognise quantities without counting) up to 5.	To add and subtract one- digit and two-digit numbers to 20, including zero. To realise the effect of adding or subtracting zero.	To extend the language of addition and subtraction to include sum and difference. To show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot.	To add and subtract numbers mentally, including: two-digit numbers, where the answers could exceed 100, a three- digit number and ones, a three-digit number and tens and a three-digit number and hundreds.	To continue to practise both mental methods and columnar addition and subtraction with increasingly large numbers to aid fluency.	To add and subtract numbers mentally with increasingly large numbers.	To perform mental calculations, including with mixed operations and large numbers.

Multiplication and Division: Solve Problems	Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.	<ul> <li>To solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.</li> </ul>	<ul> <li>To solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.</li> </ul>	<ul> <li>To solve simple problems in contexts, deciding which of the four operations to use and why.</li> <li>These include missing number problems, involving multiplication and division, including measuring and positive integer scaling problems and correspondence problems in which n objects are connected to m objects.</li> </ul>	<ul> <li>To solve two- step problems in contexts involving multiplying and adding, including using the distributive law to multiply two-digit numbers by one digit, integer scaling problems and harder correspondence problems, such as n objects are connected to m objects.</li> </ul>	<ul> <li>solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes.</li> <li>To solve problems, including in missing number problems, involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign (to indicate equivalence).</li> <li>To solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.</li> </ul>	<ul> <li>To solve problems involving addition, subtraction, multiplication and division.</li> <li>To use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.</li> </ul>
--	--	---	---	---	---	---	--

Fractions, Decimals and Percentages: Counting			<ul> <li>To count in fractions up to 10, starting from any number and</li> <li>using the <sup>11</sup>/<sub>22</sub> and</li> <li>4 equivalence on the number line.</li> </ul>	<ul> <li>To count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one- digit numbers or quantities by ten.</li> </ul>	<ul> <li>To count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.</li> </ul>	<ul> <li>To extend counting from year 4, using decimals and fractions including bridging zero, for example on a number line.</li> <li>To continue to practise counting forwards and backwards in simple fractions.</li> </ul>	
---	--	--	--	--	--	---	--

#### Savile Park Primary School Maths progression

<ul> <li>To recognise, find and name a haff as one of two equal parts of an object, shape or quantity by solving problems.</li> <li>To recognise, find and name a quarter as one of four equal parts of an object, shape or quantity by solving problems.</li> <li>To recognise, find and name a quarter as one of four equal parts of an object, shape or quantity by solving problems.</li> <li>To connect unit fractions of and name a quarter as one of four equal parts of an object, shape or quantity by solving problems.</li> <li>To connect unit fractions of and name a quarter as one of four equal parts of an object, shape or quantity by solving problems.</li> <li>To connect unit fractions of and quarters to the equal sharing and quarters as avell as recognising and combining halves and quarters as parts of a whole.</li> <li>To know that to measures, shapes. They meet # as the finding fractions of lengths, dia denominators at recognising and combining halves and quarters as parts of a whole.</li> <li>To connect unit fractions at numbers unit fractions at numbers on the numbers in the relation</li> <li>To understand to measures, of a whole.</li> <li>To is conset the relation</li> <li>To understand the relation shapes or quantity by solving problems.</li> <li>To connect unit fractions at numbers unit fractions at numbers on the numbers in the shapes. They meet # as the first example of a non-unit fractions at and vision of quantities, with particular equivalence.</li> <li>To recognise, find and write fractions of a guivience.</li> </ul>
---

Fractions, Decimals and Percentages: Comparing and ordering fractions	<ul> <li>To compare and order unit fractions, and fractions with the same denominators.</li> </ul>	<ul> <li>To compare and order fractions whose denominators are all multiples of the same number.</li> <li>To compare and order fractions, including fractions &gt; 1.</li> </ul>
--	--	--

Fractions, Decimals and Percentages: Adding and Subtracting Fractions				•	To add and subtract fractions with the same denominator within one whole through a variety of increasingly complex problems to improve fluency.		To add and subtract fractions with the same denominator to become fluent through a variety of increasingly complex problems beyond one whole.	•	To add and subtract fractions with the same denominator and denominators that are multiples of the same number to become fluent through a variety of increasingly complex problems. To recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number.		To add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions starting with fractions where the denominator of one fraction is a multiple of the other and progress to varied and increasingly complex problems.
--	--	--	--	---	--	--	---	---	---	--	--

Fractions, Decimals and Percentages: Multiplying and Dividing Fractions						<ul> <li>To continue to develop their understanding of fractions as numbers, measures and operators by finding fractions of numbers and quantities.</li> <li>To multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.</li> </ul>	<ul> <li>To multiply simple pairs of proper fractions, writing the answer in its simplest form using a variety of images to support their understanding of multiplication with fractions.</li> <li>To divide proper fractions by whole numbers.</li> </ul>
--	--	--	--	--	--	---	--

Fractions, Decimals and Percentages: Equivalence		<ul> <li>To write simple fractions for example, <sup>11</sup>/<sub>12</sub> of 6 = 3 and recognise the equivalence <sup>12</sup>/<sub>12</sub> and <sup>12</sup>/<sub>12</sub>.</li> </ul>	<ul> <li>To recognise and show, using diagrams, equivalent fractions with small denominators.</li> </ul>	<ul> <li>To use factors and multiples to recognise equivalent fractions and simplify where appropriate.</li> <li>To recognise and show, using diagrams, families of common equivalent fractions.</li> <li>To recognise and write decimal equivalents of any number of tenths or hundredths.</li> <li>To recognise and write decimal equivalents to any number to tenths or</li> </ul>	<ul> <li>To read and write decimal numbers as fractions.</li> <li>To recognise and use thousandths and relate them to tenths, hundredths, decimal equivalents and measures.</li> <li>To recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal.</li> </ul>	<ul> <li>To recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.</li> <li>To use common factors to simplify fractions; use common multiples to express fractions in the same denomination.</li> </ul>
---	--	--	--	---	---	---

Fractions, Decimals and Percentages: Comparing and ordering decimals			To learn decimal notation and the language associated with it, including in the context of measurements. To represent numbers with one or two decimal places in several ways, such as on number lines. To compare numbers, amounts and quantities with the same number of decimal places up to two decimal places.	•	To read, <i>say</i> , write, order and compare numbers with up to three decimal places.	•	To identify the value of each digit in numbers given to three decimal places.
Fractions, Decimals and Percentages: Rounding				•	To round decimals with one decimal place to the nearest whole number.	•	To round decimals with two decimal places to the nearest whole number and to one decimal place.

Fractions, Decimals and Percentages: Multiplying and dividing fractions			<ul> <li>To find the effect of dividing a one or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths.</li> </ul>	<ul> <li>To multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places.</li> <li>To associate a fraction with division and calculate decimal fraction equivalents for a simple fraction.</li> <li>To multiply one-digit numbers with up to two decimal places by whole numbers in practical contexts, such as measures and money.</li> <li>To use written division methods in</li> </ul>
				cases where the answer has up to two decimal places.

Make comparison between objects relating to size, le weight and capac Compare length, weight and capacity.	ngth, and solve practical problems for: lengths	<ul> <li>To choose and use appropriate standard units with increasing accuracy using their knowledge of the number system to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels.</li> <li>To use the appropriate language and record using standard abbreviations.</li> <li>To compare and order lengths, mass, volume/capacity and record the results using &gt;, &lt; and =.</li> </ul>	<ul> <li>To measure using the appropriate tools and units, compare (including simple scaling by integers) add and subtract using mixed units: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).</li> </ul>	<ul> <li>To estimate, compare and calculate different measures, including money in pounds and pence.</li> </ul>	<ul> <li>To use all four operations to solve problems involving measure using decimal notation, including scaling and conversions.</li> </ul>	<ul> <li>To use a number line, to add and subtract positive and negative integers for measures such as temperature.</li> <li>To solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate.</li> </ul>
--	---	--	--	---	---	--

		• To compare measures including simple multiples such as 'half as high'; 'twice as wide'.	<b>T</b>	To use the	Tourse and
Measurement: Converting Units of Measure (All Strands)			<ul> <li>To use multiplication to convert from larger to smaller units.</li> <li>To convert between different units of measure and build on their understanding of place value and decimal notation to record metric measures, including money.</li> </ul>	<ul> <li>To use the knowledge of place value and multiplication and division to convert between standard units.</li> <li>To convert between different units of metric measure.</li> <li>To understand and use approximate equivalences between metric units and common imperial units.</li> </ul>	<ul> <li>To use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places.</li> <li>To convert between miles and kilometres.</li> <li>To know approximate conversions to tell if an answer is sensible.</li> </ul>

<ul> <li>Begin to describe a sequence of events, real or fictional, using words, such as 'first', 'then'</li> <li>To recognise and use language relating to dates, including days of the week, weeks, months and years.</li> <li>To tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.</li> <li>To kert times.</li> <li>To kert times.</li> <li>To kert times.</li> <li>To to kert times.</li> <li>To to kert times.</li> <li>To tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.</li> <li>To kert times.</li> </ul>	me utes, an analogue clock, including using Roman at/to alf raw to XII, and 12- hour and oand convert time between analogue and digital 12- and 24-hour clocks.problems involving converting of time.and raw o• To solve problems digital 12-hour clocks and record their minutes; minutes; minutes to preparation for seconds; years year 4.• To solve minutes; minutes to seconds; years to days.e• To estimate and read time with an increasing hour record and compare time in• To days.
--	---

To know the number of seconds in a minute and the number of days in each month, year and leap year.
To compare durations of events.

SAV	LE PARK	

Measurement: Perimeter, Area and Volume		To measure the perimeter of simple 2D shapes.	<ul> <li>To measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres.</li> <li>To know perimeter can be expressed algebraically as 2(a + b) where a and b are the dimensions in the same unit.</li> <li>To find the area of rectilinear shapes by counting squares.</li> <li>To relate area to arrays and multiplication.</li> </ul>	<ul> <li>To measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres including using the relations of perimeter. Note: Missing measures questions can be expressed algebraically.</li> <li>To calculate and compare the area of rectangles (including using standard units, square centimetres (cm<sup>2</sup>) and square metres (m<sup>2</sup>), use the area of rectangles to find unknown lengths and estimate the area of irregular shapes. Note: Missing measures</li> </ul>	<ul> <li>To recognise that shapes with the same areas can have different perimeters and vice versa.</li> <li>To recognise when it is possible to use formulae for area and volume of shapes.</li> <li>To relate the area of rectangles to parallelograms and triangles and calculate their areas, understanding and using the formulae (in words or symbols) to do this.</li> <li>To calculate the area of parallelograms and triangles.</li> </ul>
--	--	--	---	---	---

						<ul> <li>questions can be expressed algebraically.</li> <li>To calculate the area from scale drawings using given measurements.</li> <li>To estimate volume.</li> </ul>	volume of cubes and cuboids using standard units, including cubic centimetres (cm <sup>3</sup> ) and cubic metres (m <sup>3</sup> ), and extending to other units (for example, mm <sup>3</sup> and km <sup>3</sup> ).

Properties of shape: Compare and Classify Shapes	Talk about and explore 2D and 3D shapes (for example, circles, rectangles, triangles and cuboids) using informal and mathematical language: 'sides', 'corners'; 'straight', 'flat', 'round'. Compose and decompose shapes so that children recognise a shape can have other shapes within it, just as numbers can.		<ul> <li>To identify, compare and sort common 2D and 3D shapes and everyday objects on the basis of their properties and use vocabulary precisely.</li> </ul>		<ul> <li>To compare lengths and angles to decide if a polygon is regular or irregular.</li> <li>To compare and classify geometric shapes, including different quadrilaterals and triangles, based on their properties and sizes.</li> </ul>	<ul> <li>To distinguish between regular and irregular polygons based on reasoning about equal sides and angles.</li> </ul>	<ul> <li>To compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons using known measurements.</li> </ul>
---	---	--	---	--	---	--	---

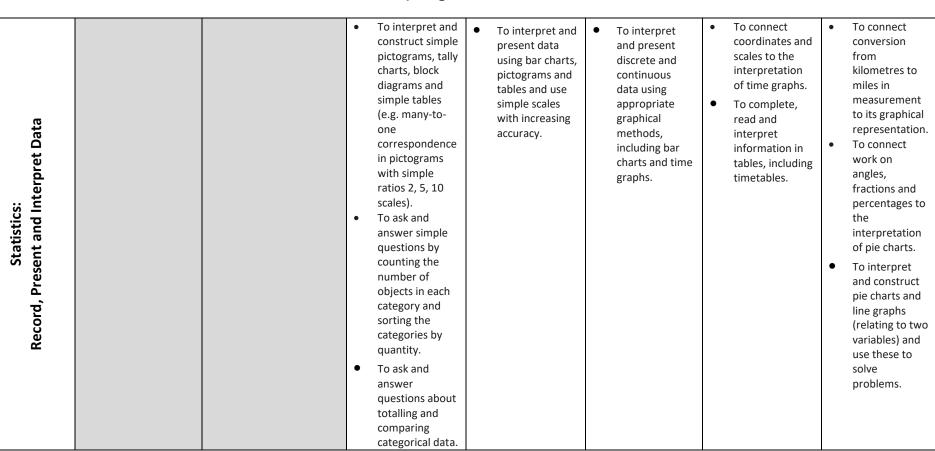

Properties of shape: Drawing 2D shapes and constructing 3D shapes	Select shapes appropriately: flat surfaces for building, a triangular prism for a roof etc. Combine shapes to make new ones - an arch, a bigger triangle etc. Select, rotate and manipulate shapes in order to develop spatial reasoning skills. Compose and decompose shapes so that children recognise a shape can have other shapes within it, just as numbers can.		<ul> <li>Pupils draw lines and shapes using a straight edge.</li> </ul>	•	To connect decimals and rounding to drawing and measuring straight lines in centimetres, in a variety of contexts. To identify horizontal and vertical lines and pairs of perpendicular and parallel lines. To draw 2D shapes and make 3D shapes using modelling materials.	•	To draw with increasing accuracy and develop mathematical reasoning to analyse shapes and their properties and confidently describe the relationships between them. To complete a simple symmetric figure with respect to a specific line of symmetry.	•	To become accurate in drawing lines with a ruler to the nearest millimetre, and measuring with a protractor. To use conventional markings for parallel lines and right angles	•	To draw 2D shapes and nets accurately using given dimensions and angles using measuring tools, conventional markings and labels for lines and angles. To recognise, describe and build simple 3D shapes, including making nets.
--	--	--	---	---	---	---	---	---	---	---	---

Properties of shape: Angles		<ul> <li>To recognise angles as a property of shape or a description of a turn.</li> <li>To identify right angles, recognise that two right angles make a half- turn, three make three quarters of a turn and four a complete turn</li> <li>To identify whether angles are greater than or less than a right angle.</li> </ul>	<ul> <li>To identify acute and obtuse angles and compare and order angles up to two right angles by size in preparation for using a protractor.</li> </ul>	<ul> <li>To know angles are measured in degrees; estimate and compare acute, obtuse and reflex angles. To draw given angles, and measure them in degrees.</li> <li>To identify: angles at a point and one whole turn (total 360°), angles at a point on a straight line 12/2 a turn (total 180°) and other multiples of 90°.</li> <li>To use the term diagonal and make conjectures about the angles formed between sides, and between diagonals and parallel sides.</li> <li>To use the</li> </ul>	<ul> <li>To recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.</li> </ul>
				<ul> <li>To use the properties of rectangles to deduce related facts and find missing lengths and angles by</li> </ul>	

					using angle sum facts and other properties to make deductions about missing angles and relate these to missing number problems.	
Properties of shape: Position, direction and movement	Understand position through words alone – for example, "The bag is under the table," – with no pointing. Describe a familiar route. Discuss routes and locations, using words like 'in front of' and 'behind'. Draw information from a simple map.	<ul> <li>To describe position, direction and movement, including whole, half, quarter and three-quarter turns in both directions and connect clockwise with the movement on a clock face.</li> </ul>	<ul> <li>To use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three- quarter turns (clockwise and anticlockwise).</li> </ul>	<ul> <li>To describe positions on a 2D grid as coordinates in the first quadrant.</li> <li>To plot specified points and draw sides to complete a given polygon.</li> <li>To describe movements between positions as translations of a given unit to the left/right and up/down.</li> </ul>	<ul> <li>To identify, describe and represent the position of a shape following a reflection (in lines that are parallel to the axes) or translation, using the appropriate language, and know that the shape has not changed.</li> </ul>	<ul> <li>To draw and label a pair of axes in all four quadrants with equal scaling. To describe positions on the full coordinate grid (all four quadrants).</li> <li>To translate simple shapes where coordinates may be expressed algebraically on the coordinate plane and reflect them in the axes.</li> </ul>

Statistics: Solve Problems				To solve one- step and two- step questions using information presented in scaled bar charts and pictograms and tables.	<ul> <li>To solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.</li> </ul>	<ul> <li>To solve comparison, sum and difference problems using information presented in a line graph.</li> </ul>	<ul> <li>To calculate and interpret the mean as an average.</li> </ul>
